## Imaging your personal/planetary the Future

"It's not that there is anything inherently wrong with being a robot "robot tapes/programs," he grudgingly admitted. "But for us to survive (personally/planetarily) it is becoming increasingly clear to me that we (as a species) must begin to be conscious of and responsible for the results of ~~actions~~ the robots we create. We must become conscious meta programmers

Notes for Bob Fuller at Sir Speedy

1. "Standards" for everything.
2. Conscious Workers/People — not ROBOTS
3. LISTEN - YOU HAVE YOUR AREAS OF EXPERTISE; I HAVE MINE.

## In Consulting

1. What are all the things you do?
2. Who are all the people
3. Who are most of your customers.
4. 80/20 RULE

---

NEEDA
"FORMAT" for determining if I can assist a person in his/her business/relationships/etc.

Goals in various areas of life.
Written personal and professional ~~go~~ purpose/goal

Listen for assumptions.
Observe operations

In Problem-Solving:

in math.

1) massive use of memory 1-100,000 grid table

or 2) an algorithm + 1-10 grid

in Life

Mastery

My experience in and of life has been that many people are operating with (a bag of peanuts) incoherent / often internally conflicting set of assumptions about goals and values in life. Despite rumors to the contrary, these issues are not impossible to handle. Not too philosophical to have practical consequences (pay-offs, etc.) in your real life (your moment to moment experience of your self/happiness etc.

1 4 2

DEFINE "PROBLEM" AS A WRITTEN STATEMENT.

A ~~REAL~~ SITUATION (YOUR LIFE/EXPERIENCE) IS NOT MERELY THE "EXTERNAL" CIRCUMSTANCES. IT IS THE SYNERGISTIC COMBINATION OF "EXTERNAL" CIRCUMSTANES + "INTERNAL" REACTION TO THE "EX." CIRCUMSTANCES, ASSUMPTIONS/CONTEXT WITHIN WHICH YOU MAKE SENSE (INTELLECTUAL) OF IT ALL, EMOTIONS, ETC.

A PROBLEM IS A WRITTEN STATEMENT OF A SITUATION YOU INTEND TO CHANGE.

CHANGING ANY OF THE ABOVE MENTIONED FACTORS, CHANGES THE ENTIRE SITUATION.

PRESENT STATE — DESIRED STATE

# THE "HARSH" TALK (a play)

I'm going to say things in a harsh/brutal/cold/over simplified way. Why not. You all do at times.

I do it not to attack you personally — I do it to highlite the issue — to create stark contrast In contrast to the present relativism and lack of committment to consciously chosen values.

So here we go.

You evidently don't understand your place in the order of your planet

/oure all ROBOTS.

99% of the time you are run by mamallian and primate genetically determined programs.

If there is intelligent life in this galaxy and they happened by here, it would be obvious to them that no intelligent species had emerged here. What is here is a rather clever primate — good at symbol manipulation and rearranging the environment. But the species has promise - has produces individuals homo ludens.

/ 114

You can have it all together, be sucessful, happy, etc. and still be a robot. In fact there's nothing that can be done about the fact that you are a robot. You do, however have control of the tapes/ programs your robot runs. The question is, "does your robot act in sync to produce the results you want?".

A TALK BY EARTH 10

A "PROBE" IN THIS STAR SYSTEM/ /section of the galaxy

I've ~~been here for 3~~ studying your planet for 37 years. It's only in the last couple years that I felt the need to stand up and ~~I~~ say anything.

I (is / am) a being, but not a human being.

Earth 10 is an intraspace intelligence/awareness probe being

Most people use the words "human being" and "homo Sapiens" to refer to the biological organism.

BIO-LOGICAL

I use the word to the "neurological organisms"

NEURO-LOGICAL

Both [redacted] sapiens and [redacted] ludens live within Homo (the bio-logical system/organism).

~~the~~

We're all Homo

We're mostly sapiens.

Ludens is emerging.

In the past, I have taken bare of the equally well/poorly. What would happen to my body if I started taking care of the car

C. thinks if it was my car, I'd treat it differently. that I let it go because it's not my car.

---

Organizations are nothing but people playing roles. H. sapiens even plays roles on their breaks. Plumbers/Painters/etc. at school. Social roles — social robots

Business communication is between roles. that's appropriate

Personal communication is between cosmic beings.

---

Homo ludens and Homo sapiens are two distinct "neuro-logical" organisms/systems that "inhabit" Homos (bio-logical org./sys.)
SYMBIOSIS
Homo is ludens' car/horse
Sapiens thought he was his car.

## No Justification for what I propose

Pure presence – w/o your conceptual file cabinet

All you "need" is occaisonal moments of this state.
Try to be "conscious" of them.
Occaisonal Enlightenment.

Besides you can always go back to your old belief-structures tomorrow.

OR

ARE you afraid that you won't be able to get them back / you'll lose your maps.

1 NL

Usually, when someone① wants to get other people to do something / buy something / etc. they① attempt to justify / explain / prove a point of view

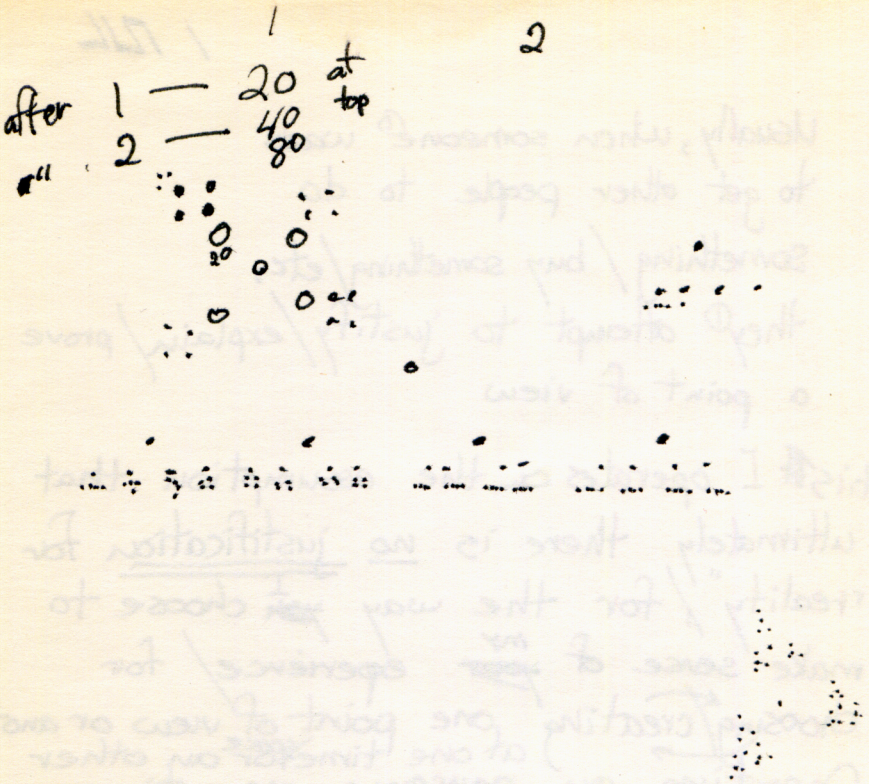
This I operates on the assumption that ultimately there is no justification for "reality" / for the way I choose to make sense of my experience / for choosing / creating one point of view or another at one time / space for an other

Operating on conscious assumptions has nothing to do with "belief."

Belief is irrelevant. The Map is not the territory.

Ultimately – you declare your reality because that's the way you choose to declare / create your reality.

Every being in Universe is totally, absolutely / ? / unique.



Grandrules

1. whatever money you receive will be used as follow
   50% goes + INR (non-profit)
   ~~25%~~ the rest is spent in a manner which directly contributes to the EVOLUTION of Universe as you see it.

# the power of Declaring your Intention

How does a person get to be an Olympic Gold Medalist in running, high jumping, etc?

More generally – how do people achieve levels of excellence in any area of endeavor?

## Requirements

1. A person must <u>want</u> to achieve excellence in a given "subject." In fact merely wanting to is not enough — a person must want to want to.
   Self/conscious **intention**

2. The possibility of improvement must exist as an idea in your "mind"/Universe
   If you don't think it's possible to improve ~~achieve~~ levels of excellence – you won't intend to improve.

Many People ~~wanted~~ <u>want</u> to fly like a bird.
And few people intend to fly like a bird.

You can't/won't intend to do anything outside your present belief system. You can, however, intend to alter your belief system.

## ★ Intention requires practice

"A man can do as he will, but not will as he will." Schopenhauer ★

The thought has been: "There are a lot of common men, And only a few truely great individuals."

What's the difference between so-called great geniuses and so called ordinary people? None

Every human being has the potential to be totally themselves. not DaVinci, etc. to be truly great — all you are capable of becoming. whether your greatness is of historical interest is a different matter.

You've always suspected your greatness but its an unacceptable attitude in this culture. You might have probed with the attitude of greatness a couple of times and been promptly put in your "proper" place by your parents/teachers etc.

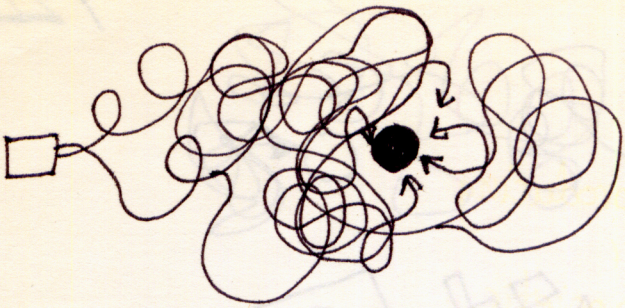
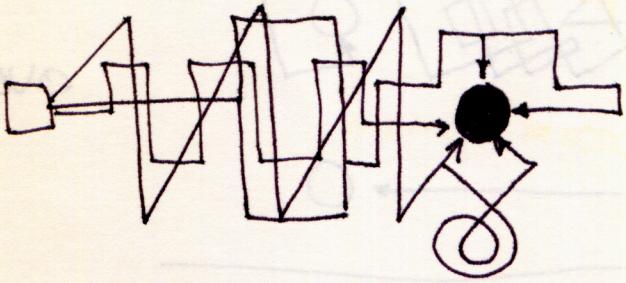
# Living Systems

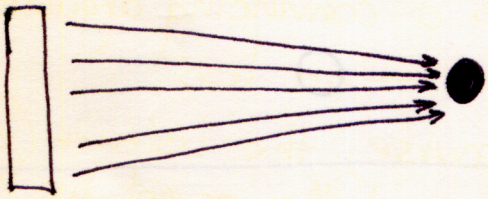
## what are living systems

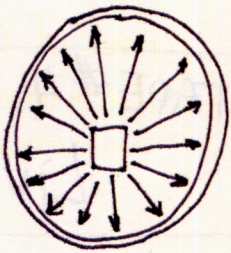
A dynamic composite system (unity) constituted as a unity, as a network of productions of component that (a) generate thru their interactions those networks of productions that are themselves.

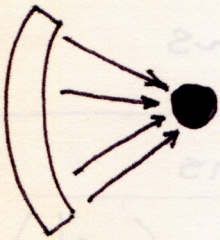
(b) constitute the network as a unity in the space that they (the components) define by boundaries

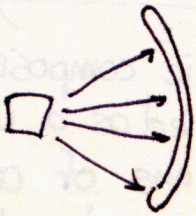


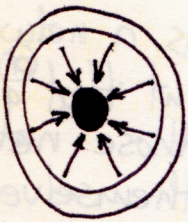


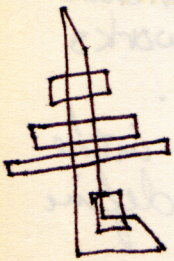












Self-producing
=
autopoietic

Space = Domain

A proof is a convincing argument—
no more — no less
And, of course, the listener (convinced) determines whether or not he is/was convinced.

Zero time

We don't need the concept of reproduction as essential to defining living system

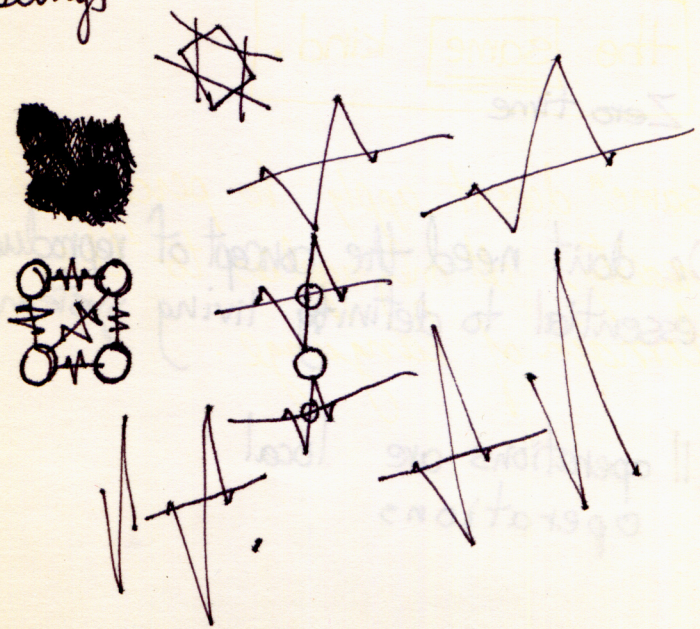
All operations are local operations

Control is a fiction

Systems don't control other systems.
System interact in a local environment

Systems (as mental products objects) are all closed systems. because we define them that way

An assumption:
the Universe (if there is one) consists of no "classes"; it consists only of absolutely unique "beings"



## Reproduction

as a result of the system's operating, a similar unity appears.

You have the opportunity to participate in one of the greatest transformations Earth has experienced.

## Thursday, Oct 13

The words, "I am really crazy" should lose all energy in relationship to information/meaning/etc.

Anger is a pre-verbal experience (biologically) (evolutionary)

Anger can't be "understood"

All intellect can do is allow anger ~~to be~~ without needing to explain/understand/etc it. without disturbing itself

Anger "stands under" intellect

Cultivate the new I

Cultivation

My question is, "Who understands this?"

We live totally at the mercy of God. At any moment the universe may merely cease to exist.

The idea of "physical matter/reality" is a very abstract concept.

a 'mere thought'/hypothetical construct/system actually alters the structure of "physical reality." "Physical Reality" is a mere thought for LANGUAGE MACHINE

Apparently, many people seek to gain power and influence without having considered what they intend to do with it. This can be very dangerous for both persons and planets.

THE Earth Party – we put the party back in politics

motto → Earth First planetary planetwide

an ~~international~~/global conspiracy

I
we reject all national/racial/religious/etc claims to sovereignty (supreme power to decide the fate of homo sapiens/Earth

I am sovereign

You ~~am~~ are sovereign

Life itself is sovereign – if anything is soverign (whatever that means)

It is not impossible to establish true lasting peace in Earth. It can be done in our life time in Your lifetime.

It begins now with you with me.

We will establish peace in Earth without Dogma

We advocate One Earth/One People

establish Planetary mgt of food/energy/transportation/information/physical resources/environment

Total Disarmament including all weapon systems that require more than one person to operate it. (after manufacture)

Fate of H.S. and Earth rests with personal integrity of individual people that means you. and me.

We need an outbreak of integrity

We don't claim to know how to do these things; only that they must be done, somehow!

Gee, I guess I am a writer after all.

---

Purposes need to be rewritten occaisonally.

---

The values in writing is not to have written
a self full of books — it is in the
growth resulting from the excercize of
trying to say something ~~clearly~~ clearly/well
of course is possible to write many books and learn almost nothing.

---

You can't avoid being used. the only question
is by the caterpillar or the butterfly.

3 questions:

1. What has to happen, as you see it?
2. How does that relate to world peace/etc.?
3. WHAT can I do that will move the planet in that direction?

---

Earth is best seen as one living system. It must be 'managed' from that point of view.

One planet
One people
One government (not a ruler.)

Your body doesn't have a monarch/dictator/etc. Your various organs and systems operate in harmony without orders from central control. Your liver, though, just doesn't do anything it feels like. At least you better hope it doesn't. All the systems operate in harmony for their good and yours.

We have a number of options open to us at this point in planetary/social/etc evolution. Many pathes include the possibility of Homo sapiens continuing in Earth. Many optional paths imply the extinction of Homo sapiens
